Professional Summary

Mobile Developer with 4+ years of experience in cross-platform mobile development and software engineering. Specialized in Flutter and Dart with proven expertise in building scalable applications for fintech, edtech, and logistics sectors. Successfully led development teams and delivered solutions serving 1,000+ users across Nigeria. Strong background in full-stack development with Node.js, real-time systems, and cloud technologies.

Technical Skills

Programming Languages: Dart, JavaScript/TypeScript, Java
Mobile Development: Flutter, BLoC Pattern, Cross-platform Development
Backend Technologies: Node.js, Express.js, Firebase Cloud Functions
Databases: MongoDB, Firebase Firestore, SQLite, Hive
Real-time Technologies: Socket.io, Firebase Realtime Database
Cloud & DevOps: Firebase, Supabase, Docker
Development Tools: Android Studio, Xcode, Git, GitHub
Web Technologies: Nextjs, Flutter Web, HTML/CSS

Professional Experience

Mobile App Developer

Virtual Switch International| Full-time, Remote | August 2025 – Present

• Worked on the Moola by Davenport Mobile application which is a mobile banking application with 1,000+ active users.

Mobile Developer

Lexington Technologies Ltd | Full-time, On-site | August 2021 – Present

• Lead mobile development team in building enterprise-scale Housing management system

(NAHIMS) for the Nigerian Army using Flutter, achieving 90% deployment and capturing over 100,000 Nigerian Army houses
 • Architected and optimized Node.js/Express.js APIs consumed by mobile applications, resulting in 8% performance improvement
 • Collaborated with senior engineers to deliver fintech solutions for companies including Roadrunner
 • Established clean architecture and scalable code practices for mission-critical applications

Software Developer

Geeksaxis Ltd | Full-time, Remote | June 2019 – July 2021

 • Engineered comprehensive ride-hailing system using Flutter and Dart, serving 100+ active users and drivers with clean, maintainable codebase
 • Integrated real-time APIs and Socket.io events for driver-passenger communication, reducing response time by 15% and improving user experience by 20%
 • Built educational mobile application (PastQ) using Flutter and Flutter Web, achieving 100+ active users
 •Architected 4B Creation Export Training Platform serving 500+ NIRSAL staff and stakeholders

 • Engineered BK Logistics Management System processing 200+ trips and ₦25M+ in logistics revenue within 6 months of deployment
 • Mentored three junior mobile developers in best practices for Flutter development, leading to a 40% improvement in code quality scores and a reduction in code review cycle time by 15 hours per week.
 • Introduced innovative development strategies including automated testing and CI/CD pipelines that enhanced application performance by 25% and reduced deployment time by 50%

Flutter Developer

Ubitech Solutions Pvt Ltd (via Mindtree) | Remote | April 2018 – April 2019

 • Created a fintech application from scratch using Flutter, Dart, Firebase, and Cloud Functions, enabling student collaboration, Q&A, resource sharing, and result tracking
 • Contributed 30% to mobile application development while maintaining high code quality standards
 • Applied Extreme Programming (XP) paired programming methodologies
 • Achieved significant code quality improvements: 8% pull request approval rate, 30% overall contribution, 10% bug fix rate
 • Collaborated with backend developers for seamless API integration
 • Real-time data streaming using Socket connections

Education

Bachelor of Science in Software Engineering
Bayero University, Kano | Nigeria

Key Projects

4B Creation Export Training Platform

Comprehensive web and mobile platform for export education and consulting services
 Technologies: Flutter Web, Node.js, Firebase
 Impact: Trained more than 500 staff and stakeholders of NIRSAL in global export trade readiness for African entrepreneurs. 🔗 [Live Demo](#)

BK Logistics and Export Management System

Multi-platform logistics management solution for Bin Khalifa Logistics
 Applications: Logistics Manager App, Escort Services App
 Technologies: Flutter, Real-time tracking, Firebase
 Impact: Streamlined logistics operations across Nigeria with more than 200 trips done in less than 6 months of operation.
 🔗 [Live Platform](#)

Skiiishow - Digital Content Platform

Video and image repository platform showcasing educational and cultural content
 Technologies: Flutter, Nodejs, Cross-platform development, Socket io
 Impact: Promoting local contents, entrepreneurship, and cultural preservation
 🔗 [Live Platform](#)

PastQ - Exam Preparation App

Mobile application providing access to past examination questions
 Technologies: Flutter, Firebase, Cross-platform development
 Impact: 100+ active users, streamlined exam preparation process
 🔗 [Google Play Store](#)

Yo Taxi - Ride Hailing Application

Complete on-demand transportation platform with rider and driver applications
 Technologies: Flutter, Socket.io, Real-time tracking, Payment integration
 Features: Real-time tracking, cashless payments, 24/7 support
 🔗 [Download APK](#)

Core Competencies

- **Leadership**: Team management and mentoring
- **Collaboration**: Cross-functional team coordination
- **Technical Innovation:** System architecture and performance optimization
- **Project Management**: Agile methodologies and delivery optimization
